DEPARTMENT OF HEALTH IN MARTIN COUNTY EXPLAINS NEW COVID-19 QUARANTINE OPTIONS

Contact:

Renay Rouse Renay.Rouse@FLHealth.gov 772-631-6008

Martin County, FL – The Florida Department of Health in Martin County (DOH-Martin) is following newly issued COVID-19 quarantine options for close contacts to COVID-19 cases. These options are adapted from CDC guidance. Close contacts are those individuals who have been within six feet of an infected individual for a cumulative time of 15 minutes or more over a 24-hour period, regardless of mask usage.

Quarantine keeps someone who might have been exposed to COVID-19 and may develop illness away from other people. Quarantine helps prevent spread of disease that can occur before a person knows they have the virus. The CDC continues to recommend a 14-day quarantine when possible. The new options reduce the burden of COVID-19 quarantines against a small possibility of spreading the virus.

Quarantine can now be 10 days without testing or seven days after receiving a negative Molecular (PCR) test result taken on or after day six from exposure. The close contact must not have any symptoms of COVID-19 to stop quarantine. Exclusions for the new options include persons who are close contacts related to long-term care facilities, acute care facilities, assisted living facilities, and nursing homes.

Appointments for PCR tests should be made in advance at most locations to ensure you can be tested on day six or later from exposure. Some testing locations may require you to verbally request a PCR test.

After stopping quarantine, you should:

- Watch for symptoms until 14 days after exposure
- If you develop symptoms, immediately self-isolate and contact DOH-Martin or your healthcare provider
- Wear a mask, stay at least 6 feet from others, wash your hands, avoid crowds, and take other steps to prevent the spread of COVID-19

Healthy Together App

The Healthy Together App is available for download on the App Store or Google Play and provides secure COVID-19 Molecular (PCR) test results. Once test results are received by the Department, a text message will be sent from the number 78549 to the phone number provided during the testing process. Recipients of the text message will be able to download Healthy Together and enter their date of birth and the phone number they provided during testing for

authentication purposes to ensure the confidentiality of their results. Results will then be available in the app. App users will be provided with resources for protecting themselves and their close contacts and can choose to receive important COVID-19 updates from the Department.

Testing

PCR testing is available via local pharmacies and healthcare providers. Costs and turnaround times to receive a PCR test result can vary by provider. Before being tested, be sure you ask about any costs associated with testing and specifically request at PCR test.

A list of state supported COVID-19 testing sites is available online:
